## **MILDRED TROEGELER**

**Director, Global Airspace Integration  
Boeing NeXt**

Mildred Troegeler is the director of Global Airspace Integration for Boeing NeXt, a business division building the ecosystem that will define the future of urban, regional and global mobility. She leads the airspace integration regulatory strategy across the company working with regulators around the world to support and enable the safe integration of autonomous systems into national airspace with a continued focus on safety.

In 2015, Troegeler joined Boeing as the director of Technical & Regulatory Affairs in Europe. In this role, she was responsible for representing Boeing interests with all European institutions, most notably the European Commission, European Aviation Safety Agency and the European Parliament, in the areas of aviation safety, cybersecurity and unmanned aircraft systems. Previously, she served as technical and operations general manager at the Association of European Airlines (AEA). Before joining the AEA, she shaped space policies at the United Nations as a legal and policy advisor to the German Aerospace Center.

Troegeler holds a law degree with a specialization in economics and competition law from the University of Bonn; and a postgraduate Master of Laws in air and space law from the University of Leiden. She is a board member of the Royal Aeronautical Society Brussels Branch.
