PATRICK M. DRUEZ

**Business Development
Global Mobility Systems
Boeing Defense, Space & Security**

Patrick Druetz is responsible for business development activities for The Boeing Company's C-17 Globemaster III program in Europe and India. Druetz joined the C-17 program in Long Beach, Calif., in 1997.

Born in Belgium in 1954, Druetz moved to the United States in 1976. After earning a Masters Degree in Physics from the University in California in Los Angeles, Druetz joined the Douglas Aircraft Company in 1981 to conduct applied research on aircraft noise.

Following his assignment as lead acoustic engineer on the high speed propeller test program, Druetz was promoted to senior principal customer engineer for the McDonnell Douglas MD-11, responsible for the technical interface with Japan Airlines, Swissair, KLM and several other airlines.
