

1.0 SCOPE

1.1 Purpose

1.2 Introduction

1.0 SCOPE

1.1 Purpose

This document provides, in a standardized format, airplane characteristics data for general airport planning. Since operational practices vary among airlines, specific data should be coordinated with the using airlines prior to facility design. Douglas Aircraft Company should be contacted for any additional information required.

Content of this document reflects the results of a coordinated effort by representatives of the following organizations:

- Aerospace Industries Association
- Airports Council International
- Air Transport Association of America
- International Air Transport Association

The airport planner may also want to consider the information presented in the “CTOL Transport Aircraft: Characteristics, Trends, and Growth Projections,” available from the US AIA, 1250 Eye St., Washington DC 20005, for long range planning needs. This document is updated periodically and represents the coordinated efforts of the following organizations regarding future aircraft growth trends:

- International Coordinating Council of Aerospace Industries Association
- Airports Council International
- Air Transport Association of America
- International Air Transport Association

1.2 Introduction

This document conforms to NAS 3601. It provides Model MD-11 characteristics for airport operators, airlines, and engineering consultant organizations. Since airplane changes and available options may alter the information, the data presented herein must be regarded as subject to change. Similarly, for airplanes not yet certified, changes can be expected to occur.
