MyBoeingFleet

YOUR PORTAL TO BOEING

MyBoeingFleet

YOUR PORTAL TO BOEING

HELPING YOU TRANSFORM YOUR BUSINESS.

MyBoeingFleet is the portal to the world's largest repository of aviation information, enhancing your ability to work collaboratively and offering you

direct access to the most up-to-date support for Boeing airplanes.

We are continually adding new products, linking them together, and creating online resources that reduce your workload, increase your efficiency, and help you make decisions more quickly.

And with MyBoeingFleet, you no longer need to distribute, store, and retrieve huge quantities of paper documents or microfilm.

The power of knowledge.

MyBoeingFleet offers the industry's most comprehensive range of support services and products.

It provides the data and documents you need, when and where you want them. Pilots, flight operations specialists, maintenance

personnel, and engineers have easy access to documentation, engineering drawings, service and operational procedures, parts and kitting information, and much more. MyBoeingFleet makes information available on line

so people in different areas of your company can work together more effectively. We put the power of knowledge to work for you.

Flight Operations Support.

For pilots and flight operations personnel, MyBoeingFleet provides performance data and information about aircraft operations, systems control, flight certification, and safety. For simulator manufacturers, we provide data on aircraft performance and flight deck configurations.

Maintenance and Engineering Services.

We make more than 100,000 manuals and more than 8 million drawings available to engineers, mechanics, and maintenance technicians.

Products include maintenance and service documents, engineering drawings, standards, repair manuals, and component maintenance manuals.

Customers can even arrange to receive notices automatically when new service bulletins and document revisions are published. Through MyBoeingFleet, Airplane Health Management subscribers can get the reports they need to make fix-or-fly decisions, preorder parts, and avoid maintenance-related schedule delays.

Fleet Enhancements and Modifications.

With the FLEET TEAM™ family of products, MyBoeingFleet helps the industry collaborate on technical and flight safety issues. We also offer electronic access to quarterly fleet reports and data on accumulated flight-hours, landings, utilization, and schedule interruptions through our fleet reliability statistics product. You can even use MyBoeingFleet to submit a warranty claim to Boeing, find program letters, download claims reports, and look up supplier contacts.

Spares and Logistic Support.

We give procurement personnel easy access to component repair and exchange services. Through the PART Page, they can obtain up-to-the-minute information about more than six million parts and place orders on line.

And with MyBoeingFleet, it has never been easier to locate information about spares provisioning or data on part interchangeability and substitutions.

Getting started.

With a computer, Internet access, and an account, you can log on to MyBoeingFleet anytime, anywhere. We deliver a comprehensive range of online products and services – integrated solutions that make it easier for you to do business with Boeing. To get started, contact your company's account administrator, or e-mail us at DDCS@boeing.com.
