# Component Services

FAST, RELIABLE, ECONOMICAL

## UNPARALLELED SUPPORT FOR YOUR 777 FLEET.

The 777 Component Services Program lets you manage repairs more effectively, minimize your inventory investment, and reduce administrative

costs. Offered jointly by Boeing and Air France Industries, the program provides a pool of exchange components ready to ship within 24 hours of your order, ensuring fast and easy access to serviceable parts for your 777 fleet. Our program also provides a single point of contact, handles warranties,

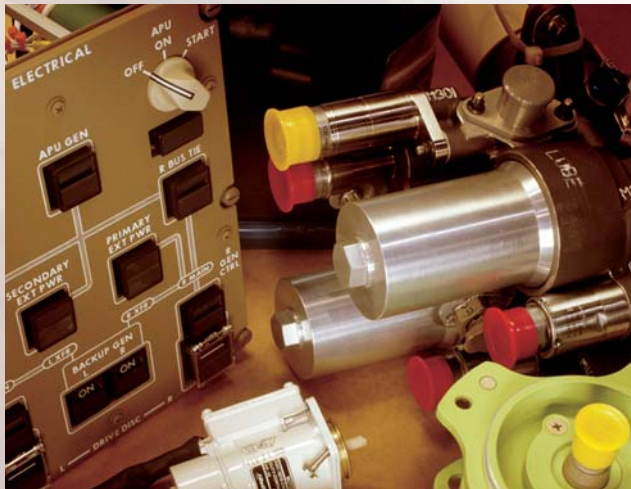

and coordinates repairs, which simplifies your administration.

### Serviceable parts that meet OEM standards.

The 777 Component Services Program provides a one-for-one-exchange: when you ship us an unserviceable part, we send a replacement that is tested, repaired, and overhauled to standards set by the original equipment manufacturer.

### A dedicated inventory minimizes service time.

By drawing on the experience of operators from around the world and analyzing which parts are removed most frequently, we have developed a dedicated inventory of more than 270 replacement components. The result: when you need an exchange component, we have it ready to ship within 24 hours of your order. The replacement can be en route to your site before the damaged unit is even removed from the airplane.

**Reduce provisioning and holding costs.**

Our pool of dedicated inventory includes dispatch-critical units and high-value components that typically account for a large part of inventory expense. Components include the flight deck, navigation systems, flight controls, avionics, hydraulics, and other systems. With our program, you can reduce your costs for initial provisioning by 25 to 40 percent and minimize in-stock inventory and holding costs.

**Rates are customized to your fleet.**

Boeing and Air France Industries manage the repair, testing, and recertification of the units at no additional charge to you.

We offer a customized rate based on fleet size and flight-hours, making it easier to forecast and plan your maintenance costs.

**Simplify administration.**

Parts are upgraded as necessary with the latest modifications, which simplifies your administration and minimizes the chance that you will stock outdated parts.

We guarantee that all modifications and repairs are certified by both the Federal Aviation Administration and Joint Aviation Authorities, allowing you to use the parts when and where you need them.
