Boeing PART Page

FAST, EASY ACCESS TO THE INFORMATION YOU WANT AND NEED

WITH OUR PART PAGE, MANAGING THE PROCUREMENT PROCESS IS EASY.

With the award-winning Boeing PART Page, customers have direct access to Boeing's extensive information and ordering system. The PART

Page provides up-to-the-minute information on millions of parts, including price and availability. Customers can order several parts at once, determine whether the parts they need are interchangeable with other parts, and track the status of their order in real time. With our page, it's

easy to manage the procurement process.

Fast, easy, web-based access.

The Boeing PART Page is the most comprehensive web-based ordering system in the industry. Access is free, either directly or through MyBoeingFleet. Designed to be intuitive for even first-time users, the PART Page won an award for innovation from the Computerworld Smithsonian program. We welcome feedback and we incorporate customer suggestions to make the page even better and easier to use.

A comprehensive range of useful features.

On the Boeing PART Page, you view up-to-date parts information, such as availability, price, and whether a part is interchangeable with another part. The screens and data-entry fields are uncomplicated and easy to navigate, and orders are acknowledged and processed in seconds. You can quickly place a new order, revise an existing one, check parts availability, and track an order – all in real time. Using search criteria, you can analyze multiple orders, which simplifies the procurement process. The page also includes security safeguards that allow you to specify the level of personnel authorized to place orders.

Additional enhancements.

- Order as many as 25 items at a time.
- Save time by getting a copy of your invoice directly from the PART Page.
- Automatically request a quote, which is returned by e-mail, for parts that are not priced.
- Obtain a customs invoice/packing sheet for international shipping, and speed the customs process by beginning your paperwork immediately.

Getting started.

All you need to use the Boeing PART Page is a web browser, a connection to the Internet, and a user account. To open an account, contact the Boeing PART Page help desk at boeingpartpage@boeing.com. We look forward to working with you.
