CABIN INTERIOR SOLUTIONS

Boeing delivers LIFECYCLE SOLUTIONS, products, services, and support that will help you to achieve success and maximize the value of your Boeing fleet throughout its life. And Boeing has a LIFECYCLE SOLUTION focused on fleet enhancements that can help your fleet retain maximum value when you need to refresh your airplane's interior and in-flight entertainment system.

DELIVERING THE BEST IN CABIN INTERIOR SOLUTIONS

Helping build your airlines brand.

At Boeing, we deliver high-quality, aesthetically pleasing, innovative products and services and a broad range of interior modernization solutions with full-service integration.

We understand you need to maintain the value of and generate maximum returns from your in-service airplanes while ensuring passenger preference.

Boeing teams with you to make sure your assets stay current, productive, and appealing through upgrades, enhancements, and modifications that reflect your unique airline brand.

Every aspect of the cabin interior reflects your brand image, from cabin architecture to in-flight entertainment systems. From stunningly detailed and distinctive laminate images to the enhanced lighting and larger stowbins, we offer products that create a cabin environment that drives passenger loyalty.

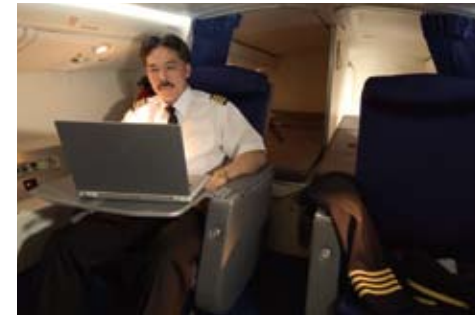

Full-service integration and program management.

As a full-service integrator, Commercial Aviation Services can perform as much of your reconfiguration or upgrade as you require or manage all aspects of your project.

We have a global network of design-and-build partners to certify, integrate, deliver, and support your requirements wherever you are located.

Our products can be customized, and our services are convenient and of the highest original equipment manufacturer quality.

We make complex systems work.

When properly integrated, in-flight entertainment systems can create strong passenger loyalty for you.

Our dedicated engineers have the expertise and access to original design data to successfully integrate and troubleshoot the most complex systems throughout every Boeing airplane.

Our immediate access to proprietary data from the original design ensures your in-flight entertainment systems are integrated properly, avoiding failures due to improper integration.

Our enhanced cooling is the only design integrated with the airplane systems to manage waste heat to avoid adverse cabin comfort and impact to other systems.

Original equipment manufacturer quality products and services

- **Project management.**
