Recorder Data Services

RECOVER HIDDEN VALUE FROM FDR DATA

VERIFY FDR SYSTEM FUNCTIONALITY AND GAIN VALUABLE MAINTENANCE INSIGHTS.

Flight Recorder Data Services (FRDS) enables you to complete required flight data recorder reasonability checks quicker and easier. Plus, FRDS

gives you valuable insight into your airplane's maintenance needs. Detailed reports provide a clear picture of the health of your recording system and clarify the impact of any discrepancies. The status of each reviewed parameter is documented, along with recommendations for specific

troubleshooting procedures that will help you optimize your maintenance plan and maximize your airplane's availability for service. Flight data recorder offers this valuable analysis at a competitive price—comparable to what you would expect to pay for a reasonability check alone.

Transmit data electronically via MyBoeingFleet.

No matter what digital media you use to store downloaded flight data, you can transmit that data directly to Flight Recorder Services via MyBoeingFleet. You can retrieve reports, analyses, and results the same way. The delay and risk of shipping physical media are completely eliminated.

Entrust the interpretation of your flight recorder data to the experts.

Interpreting flight recorder data is not a sideline at Boeing—it's one of our core competencies. When FRDS checks the reasonability of your data, you can count on the full attention of people who interpret the flight test data for all of Boeing's airplanes. The information you get from FRDS

can give you the assurance that your maintenance operation is performing at optimum levels—or show you the way to fine tune your program for even better results.

Best of all, you get this premium information service without paying a premium price.

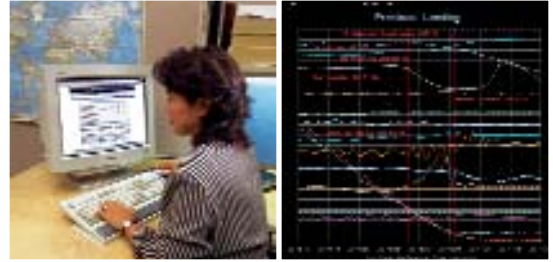

Receive detailed results promptly.

Flight Recorder Data Services can analyze your data and provide the information in a timely manner, often enabling you to complete the indicated adjustments and repairs during the airplane's scheduled hangar visit.

Consulting services offer in-depth analytical support.

Flight Recorder Data Services provides consulting services to help you optimize performance across multiple aircraft, identify the sources of recurrent or fleetwide issues, and resolve issues peculiar to your airline's operating environment.
