**ModEvaluator**  
THE ANALYSIS YOU NEED TO  
MAKE THE RIGHT DECISIONS

# ModEvaluator

SIMPLIFY DECISIONS ABOUT MODIFICATIONS

## A TOOL TO DETERMINE HOW MODIFICATIONS WILL AFFECT YOUR COSTS.

ModEvaluator is a Boeing tool available on MyBoeingFleet, the single web portal that is available to airplane owner operators. ModEvaluator helps you review service bulletins and learn how any suggested modifications to your airplane or fleet will affect your maintenance and operations costs. We created

this tool to give you the means to quickly and accurately access the financial impact of modifications on your fleet.

**You get customized analyses.** ModEvaluator is completely customizable. It uses your own fleet and cost information to represent your actual operating environment.

**Data is consistent across your company.** Everyone in your company can perform analytical tasks using identical methods and the same tool. You get a consistent set of reports for review, including an executive summary, a modification cost impact report, a break-even report, and a cost summary report, making it easy to come to a final decision. ModEvaluator provides net-present-value reports for effective evaluation of your return on investment. It also allows you to analyze one part of a system or an entire system, as the modification may require.

**A tool that lowers your costs.** ModEvaluator helps you make good business decisions about modifications. It helps you perform engineering trade studies and compare options. You save money by avoiding needless expenses and identifying when equipment changes can make you more profitable. And, you also spend less time and money making your decision.

**We've made it easy.** ModEvaluator uses a step-by-step format that's easy to learn and easy to use. It lets you know if data is missing, continuously checks your input for inconsistencies, and allows you to add comments directly on the page to improve communication within your organization.

**Your data is secure.** Every airline customer gets a high level of security and access control.
