STREAMLINE YOUR AIRPLANE SYSTEM TRAINING OPERATION

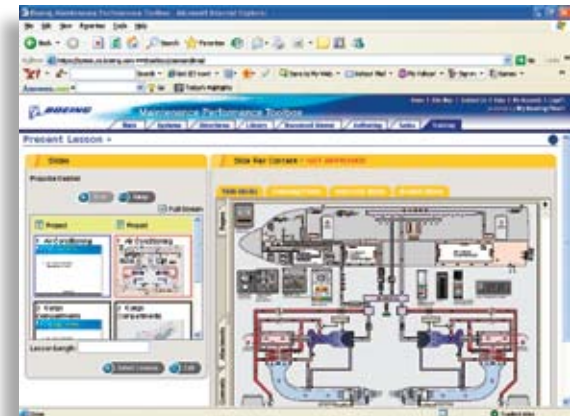

The **Training module** allows you to

- Assemble a course or lesson, keeping it up to date with the latest airplane configuration information.
- Locate and include any of the maintenance or training information contained in Toolbox, including 3D systems and tasks, photographs, synoptics, and maintenance documentation.
- Include airline-unique information stored within the customer environment.
- Include and save teaching points and instructor notes with the lesson.
- Use a presentation environment that allows for single- or dual-projector classroom presentation modes.
- Publish student and instructor notebooks for offline study.

Key benefits

- Enhanced training media for better student retention of information.
- Quick assembly of courses and lessons for tail-number-specific subjects.
- Easy assembly of courses, using the most up-to-date information from Toolbox.

- Faster and easier system cross-training.
- Classroom management tools that allow more efficient classroom presentations.

Key notes

- Requires the Library module.
- Enhanced training media requires the purchase of the Systems Tool.
