

747-400 Freighter family design features

747

■ 747-400 Freighter

- Is the fastest commercial airplane in production
- Has the most popular widebody engines
- Carries nearly 50 percent of the world's freighter cargo
- Offers a 124-ton (112-tonne) payload capability

■ 747-400ER Freighter

- Offers increased range or more payload on long routes
- Uses the same engines as the 747-400
- Retains 747-400 flight crew, maintenance, and spares commonality
- Has the most efficient ton-mile costs of any large freighter
