

# Boeing Technology Services

## State-of-the-art **Testing Facilities**

Your direct connection to the technical resources of The Boeing Company

### Put Boeing to work for you.

**Boeing Technology Services** (BTS) is your single point of contact for access to the Boeing facilities, equipment, and technical expertise that have produced some of today's most innovative products.

No other company can provide the same range of competitively priced, high quality, professional testing capabilities and services as Boeing. BTS is your contact to have this same level of excellence working for you.

Whether your testing needs are big or small, well defined or developmental, BTS will find the right facility to meet your unique requirements.

Contact the BTS team to experience the advantage of working with Boeing.

### Boeing works for you.

Subsonic wind tunnel (BVWT, 20 by 20 ft) Transonic wind tunnel (BTWT, 8 by 12 ft) Polysonic wind tunnel (PSWT, 4 by 4 ft): Subsonic, transonic, supersonic Icing wind tunnel (BRAIT, 4 by 6 ft) Low-speed aero-acoustic facility (LSAF)

#### System Test / System of Systems **Electromagnetics** Structures Full-scale static testing Antenna and radar cross-section testing ranges Live virtual constructive testing Full-scale fatigue testing Distributed test Aircraft system testing - safety of flight and Structural modal analysis Cyber testing high-intensity radiated field (HIRF) Component testing Bird strike

EMI / EMC chambers Indirect effects testing RF / IR material testing Tempest Testing

Flight Test planning and conduct Test support aircraft / Flying test bed High-speed chase and photography Flight Test safety expertise Pilots and navigation support

### Capabilities

### Wind Tunnels

### Propulsion

Nozzle test facility (BNTF) Rocket engine testing Supersonic inlet testing Fuel systems and components testing Technology inlet diffuser testing systems Fire and hazardous testing (QWIS) Halon testing

### Environmental

Dynamic environments – vibration, shock, reverberant and anechoic Thermal cycling and space simulation Interior noise test facility (INTF) Arc-jet heater for wedge & stagnation testing Sand erosion Air flow lab Ground vibration testing

### **Flight Test**

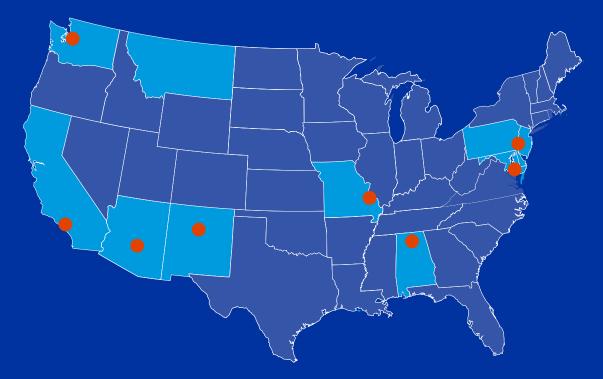

Supplemental type certification Flight Test specialized equipment (e.g. hot fuels testing) Modifications & maintenance Dedicated flight range

### **Other Services**

Functional check flight training Advanced developmental composites Model and test design / build Additive Manufacturing

We have testing facilities across the United States.

Boeing Technology Services contracts with companies, educational institutions, and government organizations for use of Boeing laboratory facilities throughout the United States.

Boeing Technology Services Contacts

To join the many companies using testing resources available at Boeing, contact Boeing Technology Services via our website at http://www.boeing.com/bts Boeing Technology Services P.O. Box 3707, MC 14-RL Seattle, WA 98124-2207
