

KC-767 TANKER EXTENDS HOSE FOR FIRST TIME

FUEL THE FIGHT.

ANY TIME.

ANY WHERE.

On February 10th, 2007, the Italy KC-767 Tanker reached another major milestone when its aircrew successfully extended and retracted the refueling hose from the centerline Hose Drum Unit (HDU) during a test flight over Kansas. The HDU and Wing Aerial Refueling Pods are built by Smiths Aerospace and represent the most advanced hose/drogue refueling systems in the world.

The Boeing KC-767 is low-risk and ready to go

- The Boeing KC-767 Tanker will provide the most advanced capability to the warfighter, lowest risk to the Air Force, and best value to the taxpayer.
- Boeing has 75 years of experience designing, building and supporting tankers.
- Boeing KC-767 Tankers are flying today.
