

JAPAN KC-767 DEPLOYS BOOM FOR FIRST TIME

On February 17th, 2007, in the skies over western Kansas, a Boeing flight test crew deployed the air refueling boom on the Japan Air Self-Defense Force's (JASDF) first KC-767 Tanker. The flight also verified boom flight control handling qualities and the integration between the aircrew and the world's most advanced refueling systems.

The Boeing KC-767 is low-risk and ready to go

- The Boeing KC-767 Tanker will provide the most advanced capability to the warfighter, lowest risk to the Air Force, and best value to the taxpayer.
- Boeing has 75 years of experience designing, building and supporting tankers.
- Boeing KC-767 Tankers are flying today.
