

## ON TO THE CARRIER WITH THE LOW-RISK APPROACH.

Boeing's unprecedented experience in unmanned combat air systems ensures a low-risk solution for the Navy's UCAS demonstration program. By bringing together the unique expertise of 64 successful flight tests of the X-45A, along with unmatched carrier integration knowledge of the current fleet, Boeing can deliver what no one else can—total confidence with the lowest possible risk.

*This Integrated Defense Systems print ad supports X-45N, Boeing's offering for the U.S. Navy's Unmanned Combat Air System Demonstration program. This ad was designed to leverage the 64 successful flight tests of the X-45A as proof of Boeing's relevant experience and knowledge of UCAS operations that make Boeing the low-risk choice for this program. The ad will appear in targeted publications including Aviation Week, Defense News and Proceedings.*
