NOISE ABATEMENT PROCEDURES

1. No touch and go practice landings are permitted.
2. Wind and safety permitting, all landings will be on Runway 09 and all take-offs will be from Runway 27.
3. In the event of a necessary landing on Runway 27, avoid a straight-in approach and avoid the Last Dollar Subdivision as follows  
Aircraft landing on Runway 27 will, after tuning from base leg to final approach leg, maintain a 15 degree angle off the Runway heading, 285 degrees magnetic, to intersect with Runway 27 at a point no further east than the Runway's safety area.
4. In the event of a necessary departure on Runway 09, all aircrafts will, as soon as safely practical, turn right 15 degrees to a departure heading of 105 magnetic, then continue the normal published pattern.
5. The traffic pattern altitude of 1500 feet (10,500 MSL) is the minimum altitude recommended in the Telluride region. Please descend to or climb to this altitude in a expedient manner when arriving and departing from the Telluride area. "Buzzing the ski area or surrounding mesas will not be tolerated."

For details, contact the airport management at 970 728 5213.

**CONTINUOUS DESCENT ARRIVAL (CDA) - [NONE](#)**

**AIRPORT CURFEWS**

Airport closed 30 minutes after sunset until 0600 local time or 30 minutes before sunrise whichever is later. Pilots operating during the curfew hours will be prosecuted.
