# Introducing the Boeing Modification Marketplace

To continue providing the best fleet services, including airplane modifications, upgrades, and retrofits, Boeing is introducing a new e-commerce website—Modification Marketplace—so you can place orders faster, easier, and smarter.

This online tool is an advancement in ordering efficiency, eliminating time spent searching static documents for information. Modification Marketplace supplements the Boeing Modifications catalog as your virtual source for airplane modification and retrofit orders. With this new tool, you can directly submit a request for proposal or buy online effortlessly.

Enjoy faster response time, easy-to-find information—including pricing, prerequisites, and delivery time—and a smarter way to order documentation, software, and parts for modifications.

## Access the new experience

Access Modification Marketplace from MyBoeingFleet.com. Within the tool you are able to select an airplane by model from the Effectivity Selector and then plan materials for your airplane modification in three easy ways: scenarios, catalog, and search options. This simplifies the ordering process and puts information in your hands anytime and anyplace.

Future features of the Modifications Marketplace will include purchasing operation weights, interactive LOPAs to generate ROM proposals for interior reconfigurations, and website optimization for tablet devices.

We will continue to share additional information during the year about new features and enhancements.

## Welcome to the new Modification Marketplace!
