Simulator Management Services

simMCP

The Boeing simulated Mode Control Panel (simMCP) hardware panel provides a reliable, cost-effective solution for your Flight Simulator Training Device (FSTD).

Boeing Flight Services offers a “plug-and-play” simulated MCP for FSTDs, utilizing the same connectivity as in the aircraft. Additionally, simMCP includes an optional USB/Ethernet connection for added flexibility in lower level devices. The simMCP functions the same as an aircraft unit with no discernible difference to an operator in the flight deck.

Value

- Reduced cost solution versus aircraft component.
- Cost effective option for spares inventory.

Airplane models

- 737-700/-800/-900
- 737 MAX
- 777-200/-200LR/-300/-300ER
- 777 Freighter

Features

- Replicates Boeing part numbers S241A100-242 and -244 for the 737 and S241W001-261 for the 777. The 777 simMCP is also replaceable with earlier models of the MCP.
- Aircraft connector for plug-and-play installation.
- Three interface options: aircraft connector, USB, or Ethernet.
- Two year warranty.
