Parts Solutions

The Emergent Build Center (EBC)

Just like you, the employees of the Emergent Build Center are passionate about keeping your airplanes in the sky, transporting passengers and cargo while earning revenue.

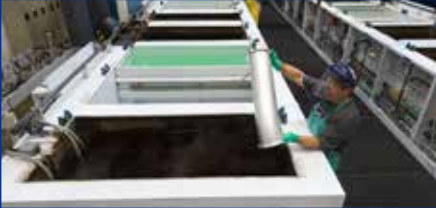

In everything we do, we believe the customer comes first. We are a creative, innovative, and versatile team whose mission is to find the best solutions to our customers' needs.

Of the nearly 11,000 Boeing airplanes flying, more than half are no longer in production. The Emergent Build Center (an element of the Boeing Support and Services – Parts Solutions suite of offerings) is focused on helping you get the right part to the right place at the right time for these out of production airplanes.

We continue to expand our capabilities and the processes required to support all of your emergent needs. As the original equipment designer and manufacturer we are uniquely qualified to build parts quickly for your airplane part requirements. Boeing Emergent Build Center employees are available around the clock and are eager to support you.
