Crew Planning

Whether you are a start-up airline looking to optimize your crew planning from the beginning or a mature airline that wishes to improve crew usage or improve management control and forecasting, the Boeing Business Consulting team has a solution that's right for you. Our consulting team has hands-on experience with crew planning and advanced optimization projects at commercial airlines. Through our consulting engagements, we can improve crew productivity and efficiency through improved planning processes and optimization tools.

Optimize your crew for increased productivity, safety and operational stability.

The Crew Planning practice offers the following consulting services:

Crew Planning and Process Improvements

- Crew-productivity evaluation
- Crew-management process evaluation
- Crew-management process development
- Key Performance Indicator development
- Union contract support and facilitation

Fatigue Management

- Fatigue Risk Management assessment
- Disruption-mitigation planning

Proven value

You can achieve measurable results through our services:

- Up to 15 percent reduction in flight crew cost
- 50 percent reduction in training planning time
- 1.8 percent crew cost reduction by using re-timing functionality
- Up to 90 percent fewer fatigue reports
- Improved forecasting capabilities
