MAINTENANCE AND ENGINEERING SOLUTIONS

Maintenance Performance Toolbox

Library

Maintenance Performance Toolbox is a complete fleetwide airplane and engine document management solution. The Library module stores aircraft and engine maintenance information, irrespective of the manufacturer, in a variety of data-rich formats and has advanced navigation and search capabilities. This module offers a single source of information for all fleets by consolidating manufacturer and airline documents and provides access to documentation anywhere, anytime.

Every document you need is now at your fingertips

The Library module stores aircraft and engine maintenance information for Boeing and non-Boeing airplanes as well as General Electric, Rolls-Royce, and Pratt & Whitney engines in XML format.

- Intelligently tagged for use by additional Toolbox modules and other Boeing maintenance and engineering applications
- Extensive use of hyperlinking for navigation

The Library module allows you to

- Get your documents with or without network connectivity
- Receive data updates directly to a mobile device
- Search within one or more documents or across the entire Library
- Group documents hierarchically within categories and subcategories
- Accept airline-originated documents in any file format
- Prevent uncontrolled versions of documents

Key benefits

- Single source of information for all fleets.
- Intelligent graphics linked to work instructions
- Reduced airplane turn times with instant access to maintenance documents
- Supports document compliance at the point of need -- the airplane
- Improved labor efficiency
- View tail-specific documents through filtering
- Immediate application of original equipment manufacturer revisions
- Incorporation of operator and supplemental documents
- Seamless integration with other Boeing mobile maintenance applications

Toolbox Library is offered as Toolbox Library Preferred and Toolbox Library Prime

Key Functionalities	Preferred	Prime
