## Defense, Space & Security

### Overview

[Defense, Space & Security](#) is one of The Boeing Company's [NYSE:BA] three business units. Its portfolio includes manned and unmanned aircraft programs; space and satellite systems; intelligence and security systems; and extensive integration expertise. The business employs about 32,000 worldwide.

### Organization

The world's second-largest defense company, Defense, Space & Security is the only aerospace business offering products and capabilities allowing its customers to meet mission requirements from the sea bed to outer space. It serves a diverse customer base, but its portfolio is focused in six key market areas: Commercial Derivatives, Military Rotorcraft, Human Space Exploration, Satellites, Autonomous Systems and Services. Its organization structure reflects this strategy through its seven divisions:

- **Autonomous Systems** – Develops and produces remotely piloted aircraft and submersibles. Manages Boeing's In Situ subsidiary.
- **Development** – Enhances performance on key defense and space pre-production development programs by consolidating management, expertise and resources into one organization.
- **Global Operations** – Leads Defense, Space & Security's international subsidiaries (Boeing Defence Australia, Boeing Defence India, Boeing Defence Saudi Arabia, Boeing Defence United Kingdom), seeks opportunities for additional global growth.
- **Phantom Works** – Creates and advances new products and capabilities by drawing on its expertise in innovation, advanced experimentation and prototyping.
- **Space and Missile Systems** – The world's largest satellite manufacturer also offering strategic missile and defense systems, weapons systems and other space and intelligence systems. The division houses Boeing's more than 60 years of space exploration expertise and manages Boeing's share of United Launch Alliance and United Space Alliance.
- **Strike, Surveillance and Mobility** – Manages Boeing's current and future portfolio of fixed-wing military and surveillance aircraft, including fighters and commercial derivative platforms, and support of key platforms such as the executive transport fleet, which includes Air Force One.
- **Vertical Lift** – The world's largest provider of military rotorcraft with a diverse portfolio of cargo, tiltrotor and attack platforms.

Led by President and CEO Leanne Caret, the business is based in Arlington, Va.
