

# Partnership with Latin America and the Caribbean

## SUPPORTING ECONOMIC GROWTH

**+1,300** 

In Latin America, the number of Boeing employees reaches **more than 1,300, including our subsidiary, Boeing EnCore Interiors**—an aerospace interiors company in Mexico.

**+70** **suppliers**

Boeing has **42 direct suppliers and 29 indirect suppliers** in 3 Latin American countries that manufacture structures, wings, and propulsion/aerospace commodities.

**2,365** 

Boeing expects demand for **2,365 new airplanes** from Latin America and the Caribbean over the next two decades.

## LEADING SUSTAINABILITY

In partnership with Unicamp University, in Brazil, Boeing has contributed to the creation of SAFMaps, a database that allows understanding the availability of the most promising raw materials to produce sustainable aviation fuels in specific areas of the country. Boeing is the only company funding the project since 2023.

**\$2 million**

With the Roundtable on Sustainable Biomaterials, Boeing invested **\$2 million** in initiatives that maximize social, economic and environmental benefits to local Brazilian communities developing feedstock for SAF production.

Boeing created a **Sustainable Aviation Biofuels Roadmap** for Brazil by conducting a national assessment of the challenges and opportunities associated with SAF development and commercialization.

## OUR FLEET AND SERVICES

Boeing has defense products in **5 countries** ranging from helicopters, harpoon missiles, UAVs, biplane trainers, tanker transports, light-attack bombers and satellites.

**+550** **airplanes**

There are more than **550 Boeing commercial aircraft** in service in Latin America.

Boeing has assisted Aeromexico lead data analysis initiatives and implement **digital tools** to reduce fuel burn and fuel emissions. Aeromexico is one of Boeing's top-performing partners in operational efficiency.

## INVESTING IN INNOVATION

Since the inauguration in 2014 of Boeing Research & Technology Brazil (BR&T-B) — now Boeing Technology and Innovation (BTI) — the company has filed more than 30 patent applications worldwide, three of which have already been granted in Brazil.

Unveiled in 2023, Boeing Engineering - Brazil is part of a global network of 15 hubs that work on engineering and advanced technology, driving aerospace innovation.

## ENGAGING WITH THE COMMUNITY

Boeing has donated over **\$7 million** in charitable contributions to 9 Latin American countries since 2008, including \$900K that was used to advance STEM Education in 2020.

Boeing works with the **Pan-American Development Foundation** within 8 Latin American countries to train teachers and challenge students through STEM Americas Academies.

Boeing has invested in Latin American communities since 2008, **contributing \$5.3 million** since then to increase diversity, skills and interest in STEM careers.
