Italy encompasses a fine blend of old and new, from ancient architectural wonders to renowned modern design in automobiles, fashion and even everyday appliances. That combination is demonstrated by the town of Grottaglie, home to both a 13th-century castle and a cutting-edge factory producing 787 Dreamliner fuselage barrels using large mandrels and autoclaves to form the single-barrel composite Viva l’Italia

Boeing and Italy enjoy strong ties and partnerships that benefit both By Eric Fetters-Walp

Italy encompasses a fine blend of old and new, from ancient architectural wonders to renowned modern design in automobiles, fashion and even everyday appliances. That combination is demonstrated by the town of Grottaglie, home to both a 13th-century castle and a cutting-edge factory producing 787 Dreamliner fuselage barrels using large mandrels and autoclaves to form the single-barrel composite pieces. Operated by Alenia Aermacchi, a Finmeccanica company, the factory makes fuselage sections 44 and 46— the middle of the Dreamliner.

“It has been extremely important for Alenia Aermacchi to be part of the global team that has worked—and will continue to work—on the 787 program,” said Alenia CEO Giuseppe Giordo. “It’s an experience that has enabled our company to take its technological expertise in composite materials to the highest levels and hence to become even stronger and more competitive as a global player in the aerostructures industry.”

Alenia also has made horizontal stabilizers for the 787 in Italy, as well as radomes, fins and control surfaces for the 767. It’s the continuation of a long-standing link between Alenia and Boeing on a series of Commercial Airplanes programs, including the McDonnell Douglas DC-9 and the 767, for which Alenia assisted with design and construction.

In addition to the supplier relationship, Boeing and Alenia in 2007 agreed to jointly develop research activities in advanced materials and aerostuctures, leading to the opening of a Boeing Italian Research Office near Naples.

“The 787 represents today the high point of the intense relationship that Boeing has been able to develop with the Italian air industry: a relationship which, as every relationship, has also had its difficulties, but which constantly proceeds and progresses in the mutual interest for the realization of this great airplane,” said Rinaldo Petignani, president of Boeing Italy. “Under their new leadership, both Alenia and Finmeccanica are now poised to make new progress and to improve and expand even further their relationship with Boeing.”

Boeing and Italy have a number of ties in commercial and military aviation, and the collaboration has grown significantly in recent years, said Shep Hill, president of Boeing International and senior vice president of Business Development and Strategy. Italy is Boeing’s second-largest supplier in Europe, excluding engine purchases, he said.

“The 787 represents both an important market for our business units and an important industrial and research partner,” Hill said. “Italians represents both an important mar-

Italy is an extremely important U.S. ally and a valued customer and industrial partner in both the commercial and defense markets.”

While Italy and Boeing collaborate on the 787 and other Commercial Airplanes programs, the nation’s military and Boeing Defense, Space & Security also are solid partners on a number of fronts.

Rinaldo Petrignani, president of Boeing Italy, said Italy is an important U.S. ally, as well as a valued customer and industrial partner for military products. Most notably, the nation was a launch customer of the International 767 Tanker, and Italy’s AgustaWestland is co-producing the Chinook helicopter for Italy’s armed forces.

“Boeing enjoys long-standing relationships with all branches of the Italian military, and close collaboration with Italian industry has been, and will continue to be, critical to the success of programs such as the CH-47F,” said Oris Davis, director of BDS International Business Development for Southern Europe. “Italy also offers great future market possibilities for areas such as energy, information assurance, maritime domain awareness and critical infrastructure protection.”

Boeing partnered with Italy to develop, produce and support the KC-767A Tanker Transport aircraft for Italy’s air force. In May 2009, Boeing agreed to license production of 16 ICH-47Fs to AgustaWestland. Boeing provides aircraft sections, components and production support. The contract awards AgustaWestland to market and sell the ICH-47F in specific countries and around the Mediterranean.

“We have, in fact, produced in Italy, together with AgustaWestland, the first CH-47C for the Italian Army and now, also for the Italian Army, the new model, the -F, the industrial production of which is about to begin soon in northern Italy,” Petrignani said. “And this is going to turn into another great success story in our relationship with the Italian Army.”

Among other defense and space projects under way or recently completed are:

- Boeing products widely used by Italian armed forces
- Boeing’s presence in Italy can speed up in many ways the industry and technological growth with partnerships and collaborations with private and public entities, Russo said. It also makes stronger the political friendship between the U.S. and the Italian government. Not least for the Italian suppliers, working for Boeing means creating more jobs and opportunities for the Italians.”
- Francesco Bombassei, Engineering, Operations & Technology’s IT International Operations manager, said there are many benefits from Boeing’s partnering with Italian suppliers.
- “Boeing’s presence in Italy can speed up in many ways the industry and technological growth with partnerships and collaborations with private and public entities,” Russo said. “Boeing’s presence in Italy can speed up in many ways the industry and technological growth with partnerships and collaborations with private and public entities,” Russo said. “It also makes stronger the political friendship between the U.S. and the Italian government. between Boeing and Italian partners:

- Boeing and Finmeccanica’s Oto Melara subsidiary are making Joint Direct Attack Munition kits for Italy’s air force and navy. The two also have agreed to produce Small Diameter Bombs for Italy’s air force.
- Using its Delta II rockets, Boeing has successfully launched the first four satellites of the COSMO-SkyMed program in collaboration with the Italian Space Agency and Thales Alenia Space.
- Boeing Global Services & Support has an agreement with Alenia Aermacchi, a Finmeccanica company, to support the new-generation M-346 lead-in fighter jet trainer and M-311 basic jet trainer by providing a ground-based training system and after-sales support services.

“There are many other examples of Boeing products and technologies, resulting from collaboration with Italian industry, that have been chosen by the Italian armed forces for the strengthening of the Italian defense posture on land, on sea and by air and in the interest of a successful accomplishment of the NATO missions in the Mediterranean and elsewhere,” Petrignani said.

Boeing and Alenia engage Italian students on the environment

While Italian employees are helping build one of the world’s most environmentally progressive airplanes, the 787, students in Italy are learning about sustainability through a program launched by Boeing and industry partner Alenia Aermacchi, a Finmeccanica company.

In its first three years, Naturalmente scuola has involved more than 26,000 Italian elementary and secondary students at 860 schools in the Puglia region, near Alenia’s 787 fuselage barrel plant. It has gained the United Nations Educational, Scientific and Cultural Organization’s patronage as well.

Armida Balla, Global Corporate Citizenship administrator in Italy, said the program provides plenty of hands-on activities to engage students in the topics of sustainable technologies and environmental protection. Environmental issues are a big concern in the Puglia region, and Naturalmente scuola teaches children practical ways how they can limit their impact on the world around them.

“We are proud of this program and look forward to its next edition, when we will enjoy the contribution of various universities,” said Rinaldo Petrignani, president of Boeing Italy.

Boeing Italy has sponsored “Migration and Change: Learning to Live Together in an Increasingly Diverse World,” which addresses — through workshops aimed at students — issues of cultural, ethnic, and religious diversity. The program was co-organized by the Center for American Studies in Italy.

Balla said local governments and institutions have been receptive to working with Boeing on corporate citizenship projects. Also, suppliers beyond Alenia are cooperating on charitable projects.

“The corporate citizenship initiatives have enormously increased Boeing’s reputation in the country,” Balla said. “I like to tell people that I work for a company that does great things in the world.”
