

Runway Roughness Software

A number of consultants have requested whether the Boeing Airport Compatibility Group provides runway roughness software to be used in conjunction with our document, "Runway Roughness Measurement, Quantification, and Application – The Boeing Method." We currently do not provide any roughness measurement software, but one can access a program from the Federal Aviation Administration's (FAA) website called PROFAA, which has a Boeing bump analysis routine built into it. That website is as follows:

<http://www.airporttech.tc.faa.gov/Pavement/25rough.asp>

Additional questions concerning this issue can be directed to Boeing's Airport Compatibility group as follows:
