simACP

Support and Services

FLIGHT OPERATIONS SOLUTIONS
The Boeing simulated Audio Control Panel (simACP) hardware panel provides a reliable, cost-effective solution for your Flight Simulator Training Device (FSTD).

Boeing Flight Services offers a “plug-and-play” simulated Audio Control Panel for FSTDs, utilizing the same connectivity as in the aircraft. Additionally, simACP includes a USB connection for added flexibility in lower level devices and has an optional Ethernet interface. The simACP functions the same as an aircraft unit with no discernible difference to an operator in the flight deck.

**Value**
- Reduced cost solution versus aircraft component.
- Cost effective option for spares inventory.

**Airplane models**
- 737-600/-700/-800/-900
- 737 MAX

**Features**
- Replicates Boeing part numbers 10-62090-64, -77, -86, and -88.
- AVTECH part number 5145-1-64, -77, -86, and -88.
- Aircraft connector for plug-and-play installation.
- Three interface options: aircraft connector, USB, or Ethernet.
- Two year warranty.

**Price**
Contact Boeing Flight Services for pricing information.
