Support and Services

FLIGHT OPERATIONS SOLUTIONS
The Boeing simulated Electronic Flight Instrument System (simEFIS) hardware panel provides a reliable, cost-effective solution for your Flight Simulator Training Device (FSTD).

Boeing Flight Services offers a “plug and-play” simulated Electronic Flight Instrument System hardware panel for FSTDs, utilizing the same connectivity as in the aircraft. Additionally, simEFIS includes a USB connection for added flexibility in lower level devices and has an optional Ethernet interface. The simEFIS functions the same as an aircraft unit with no discernible difference to an operator in the flight deck.

**Value**
- Reduced cost solution versus aircraft component.
- Cost effective option for spares inventory.

**Airplane model**
- 737 MAX

**Features**
- Replicates Boeing part number S242A403.
- Replicates Rockwell Collins part number 822-3252-001.
- Aircraft connector for plug-and-play installation.
- Three interface options: aircraft connector, USB, or Ethernet.
- Two year warranty.
