

BUILDING THE FUTURE TOGETHER

Boeing, the European Union and NATO

Boeing has been a part of the European aerospace community for more than 80 years, contributing to and benefiting from the region's tradition of innovation and excellence.

Today, Boeing and its many European airline customers and supplier partners are interdependent. The company maintains strong connections and solid relationships with stakeholders across Europe, including the European Union, NATO, European governments, customers, suppliers, research and development organisations, nonprofit organisations and regulatory bodies. In Brussels, the Boeing office represents the company's interests with all European institutions, most notably the European Commission, the European Parliament and NATO, supporting policies that advance the EU economy; promote sustainable growth; contribute to a safe, innovative and competitive aerospace system; and connect EU citizens and businesses.

21ST CENTURY POLICIES AND PARTNERSHIPS

Boeing, EU regulators, NATO and industry stakeholders partner in several significant areas.

Safety & Certification

Working together to advance safety in all areas of the global air transport system.

Unmanned Aircraft

Establishing responsible global regulations focused on safety while developing this emerging technology.

NATO

Unparalleled partnerships delivering mission-critical capabilities for the world's most successful alliance.

Environment

Scaling sustainable aviation fuels and advancing innovation in cleaner technology.

Defence & Space

Creating a vibrant industrial environment to meet collective security challenges and foster defence cooperation.

Unmanned Traffic Management

Creating an airspace management system that safely integrates unmanned aircraft systems (UAS).

Cybersecurity

Ensuring effective collaboration between government and industry against evolving and emerging threats.

Fair Competition

Promoting globally accepted, rules-based trade to enable a level playing field.

Community

Inspiring tomorrow's innovators and ensuring future aerospace pioneers have the skills needed for 21st-century careers.

LOCAL PARTNERSHIPS WITH GLOBAL IMPACT

Boeing continues to invest in European companies and people, and is proud of the success of its enduring transatlantic partnership with European industry, governments and local communities.

190,000

Our programmes support nearly 190,000 highly skilled jobs in Europe.

€25 billion

Boeing sourced €25 billion in aircraft components from hundreds of European partners in the last 3 years.

€4 million

In 2018, Boeing announced an investment of more than €4 million for pan-European STEM projects.

BOEING IN THE EU AND NATO

Local Partnerships with Global Impact

Boeing and its many European airline customers and supplier partners are interdependent. The company maintains strong connections and solid relationships with stakeholders across Europe, including the EU, European governments, research and development organisations, international agencies and regulatory bodies. Boeing works together with these entities to strengthen the role of aerospace in Europe and in the global economy. The company also collaborates with them on sectoral issues such as safety and certification, the environment, cybersecurity, unmanned aircraft, fair competition, unmanned traffic management, defence and security cooperation.

Fueling Economic Growth

Boeing directly employs more than 5,000 talented people across Europe. The company has directly delivered 4,600 commercial aircraft to more than 130 European customers in the last six decades, and Boeing's advanced defence platforms are in service with 23 European armed forces. Boeing's commercial, defence and services programmes support nearly 190,000 highly skilled jobs in Europe.

Boeing enhances European competitiveness by investing in the talent, skills and technologies offered by its scientists, engineers and technicians. Boeing is growing its local presence with new European facilities and partners performing cutting-edge work and by actively supporting environmental, educational and social programmes.

Inspiring Tomorrow's Innovators and Aerospace Pioneers Today

By continuing its partnership with European research institutions, nonprofit organisations (NGO), governments and local communities, Boeing helps build a more sustainable future. With innovative community partnerships all across Europe, Boeing is inspiring tomorrow's innovators and aerospace pioneers, ensuring they have the necessary 21st-century skills to solve critical scientific, environmental and societal challenges.

Boeing's dedication to future generations is manifested in its growing educational partnership and ongoing efforts to deliver the best performing, most efficient products and services in aviation.

In 2018, Boeing announced an investment of more than €4 million for additional pan-European science, technology, engineering and mathematics (STEM) projects with NGO partner Newton Europe, an organisation dedicated to engaging future leaders and pioneers in STEM education.

Partnering with European Airlines

Boeing Commercial Airplanes has an enduring presence in Europe as a major aircraft manufacturer for many European airlines. By providing more efficient and environmentally progressive commercial aircraft, Boeing works with airlines to help them maintain sustainable growth. Each year,

Boeing aircraft carry 385 million passengers from Europe to destinations all over the world.

European customers have relied upon Boeing products for decades. Several have partnered with Boeing to launch new aircraft models that continue to improve the competitiveness and capabilities of the industry.

Boeing Defence and Space Contributing to NATO and European Security

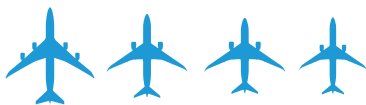

Boeing has supported NATO and the European defence community for decades and is committed to helping NATO and European nations meet the evolving security challenges of the 21st century. Boeing systems, solutions and services play an integral role in the military, peacekeeping and humanitarian assistance operations of NATO and many European nations. Today, Boeing advanced defence systems are in service with 23 European armed forces.

Boeing is proud of the success of its enduring and mutually reinforcing transatlantic partnership with European industry. The most recent demonstrations of this are the success of the Boeing-SAAB team, which won the U.S. Air Force's trainer aircraft competition with the all-new T-X trainer, and Leonardo and Boeing's MH-139 helicopter, which has been awarded for the U.S. Air Force's UH-1N Huey replacement.

In its second century, Boeing will further leverage its strategic partnerships across Europe to deliver best in industry to customers, governments and warfighters.

EUROPE AND NATO: BOEING COMMERCIAL, DEFENCE AND SPACE, AND SERVICES

Commercial

Boeing Commercial Airplanes has an enduring presence in Europe as a major aircraft manufacturer for many European airlines:

- **Deliveries:** Boeing has directly delivered over 4,600 commercial aircraft to more than 130 European customers in the last six decades.
- **Forecast:** European airlines are forecast to acquire almost 9,000 new aircraft in the next 20 years.
- **Supply chain:** Boeing 737, 747, 767, 777 and 787 programmes boast breakthrough technologies and systems from hundreds of European suppliers.
- **Launch customers:** Several European airlines have partnered with Boeing to launch new aircraft models, including the Boeing 737, 747-8 and all-new 777X.
- **Manufacturing:** High-tech 737 and 767 components are manufactured in Sheffield, U.K.
- **Passengers:** Each year, Boeing aircraft carry 385 million passengers from Europe to destinations all over the world.

Defence & Space

Boeing defence and space platforms and systems in service with European partners and NATO nations include:

- **Vertical Lift:** CH-47 Chinook and AH-64 Apache
- **Strike and Mobility:** F/A-18, KC-135 and KC-767 Tanker, C-17
- **Surveillance, AEW&C and Autonomous Systems:** AWACS, P-8, ScanEagle, Wave Glider
- **Space & Missile Systems:** Boeing Wideband Global SATCOM (WGS), 702HP Satellite, JDAM, SDB, Harpoon

Services

Boeing Global Services has a significant presence in Europe through its subsidiaries and joint ventures:

- **Boeing Flight Services:** Training campus near Gatwick Airport provides advanced flight training devices.
- **Jeppesen:** Offers air navigational information to customers all over the world with offices in Germany, Italy, U.K., Sweden and Poland.
- **KLX, now Boeing Distribution Services:** Distributor of aviation parts and services has European operations in Germany, U.K., France, Poland, Czech Republic, Italy and Spain.
- **Adient Aerospace:** Joint venture between Boeing and Adient offers a portfolio of aircraft seats out of Germany.
- **Aviall:** Distributor of aircraft parts supplies chemicals, tools and materials, has offices in the Netherlands.
