F/A-18E/F SUPER HORNET BLOCK III

Combat-Proven, Next-Generation, Multirole Strike Fighter

EVOLVING THE SUPER HORNET

Robust capability insertion plan will keep the Super Hornet ahead of the future threats and in the fight for decades to come

Active Electronically Scanned Array (AESA) Radar Upgrades

Advanced Computing (DTP-N) Advanced Network (ATDL)
• Net-Enabled Operations and Weapons

Advanced Cockpit System
• Advanced Sensor Integration and Fusion
• Common Tactical Picture

Next-Gen Forward-Looking Infrared

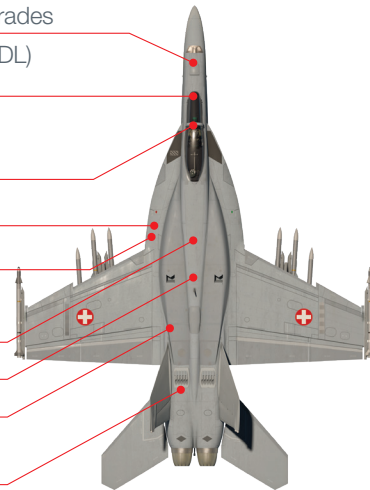

Infrared Search and Track (IRST)

In-Flight Refueling Capabilities

SATCOM

Conformal Fuel Tanks

Signature Enhancements Integrated Defensive Electronic Countermeasures (IDECM) Block IV

Battlespace Situational Awareness

Long-Range Counter Stealth Targeting

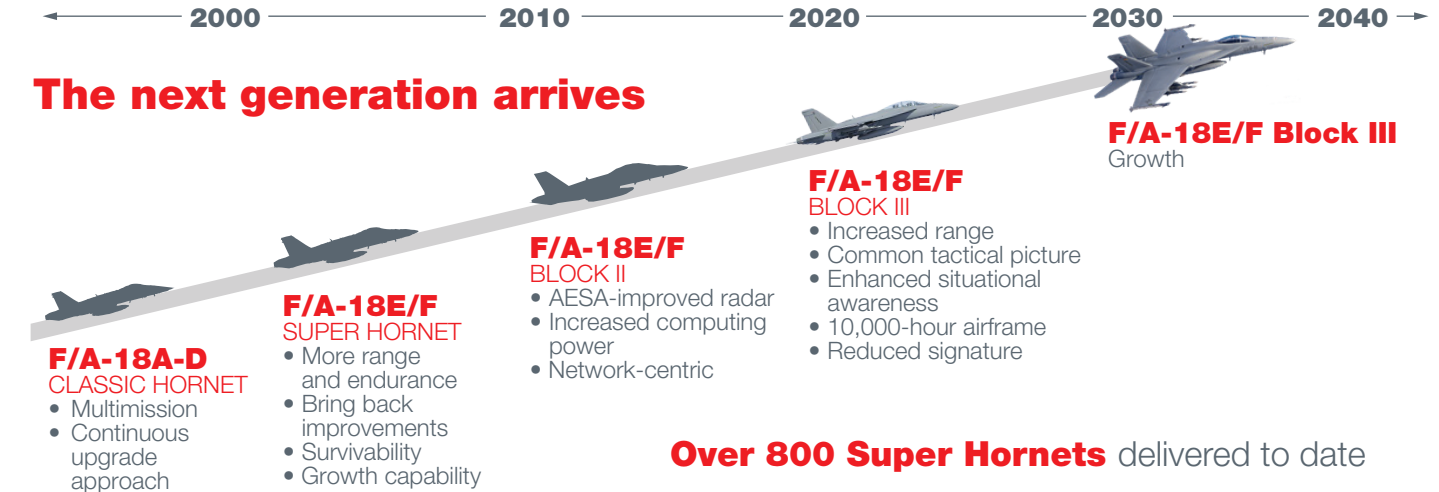

Rapid Technology Insertion

Improved Survivability/ Reduced Signature

Room for Growth

EVOLVING THE SUPER HORNET

The U.S. Navy will continue to invest in the Super Hornet Block III through 2033 and allow the Super Hornet Block III to be flown through the 2050s

EASE OF TRANSITION

Proven capabilities and a guaranteed delivery schedule make the Super Hornet a low-risk, low-cost solution ideally suited to meet Switzerland's fighter aircraft requirements

INFRASTRUCTURE

60% of Switzerland's existing infrastructure can be used to support a Super Hornet fleet

LIFE CYCLE

Low documented life-cycle costs can easily fit within Switzerland's current Hornet operating budget

TRAINING

Reuse of existing Swiss Air Force infrastructure can minimize nonrecurring cost, time and risk

IDEALLY SUITED

Designed for Switzerland's operational requirements, the Super Hornet is able to perform every mission in the tactical spectrum and in the harshest environments

BOEING IN SWITZERLAND

Boeing creates partnerships for long-term value

25+ YEARS

Boeing has enjoyed a great relationship with many Swiss industry partners over the last 25 years as a result of working on various aspects of the classic Hornet program

US\$1.3B COMPLETED COMMITMENTS

Completed US\$1.3B in industrial engagement commitments related to the F-18 sale

7 YEARS

Obligations completed three years ahead of the 10-year period of performance

100+ COMPANIES

Engaged with more than 100 companies across Switzerland to identify the right partnership opportunities for its New Fighter Aircraft industry plan

ONE GLOBAL ENTERPRISE

Utilizing the full Boeing enterprise, including our Commercial Airplanes business, to develop the best-value indirect offset plan
