EA-18G ADVANCED GROWLER

The World's Premier Electronic Attack Aircraft

FULL SPECTRUM ELECTRONIC ATTACK

Advancing and adapting to control the electromagnetic spectrum and counter future threats

Active Electronically Scanned Array (AESA) Radar Upgrades

Airborne Electronic Attack Suite Upgrades

Advanced Cockpit System
• DTP-N/ATDL
• Open System Architecture

Advanced Targeting Forward-Looking Infrared Integration

Next Generation Jammer
• Mid-Band/Low-Band

Advanced Electronic Attack Suite

SATCOM

Conformal Fuel Tanks

10K+ Flight Hour Airframe

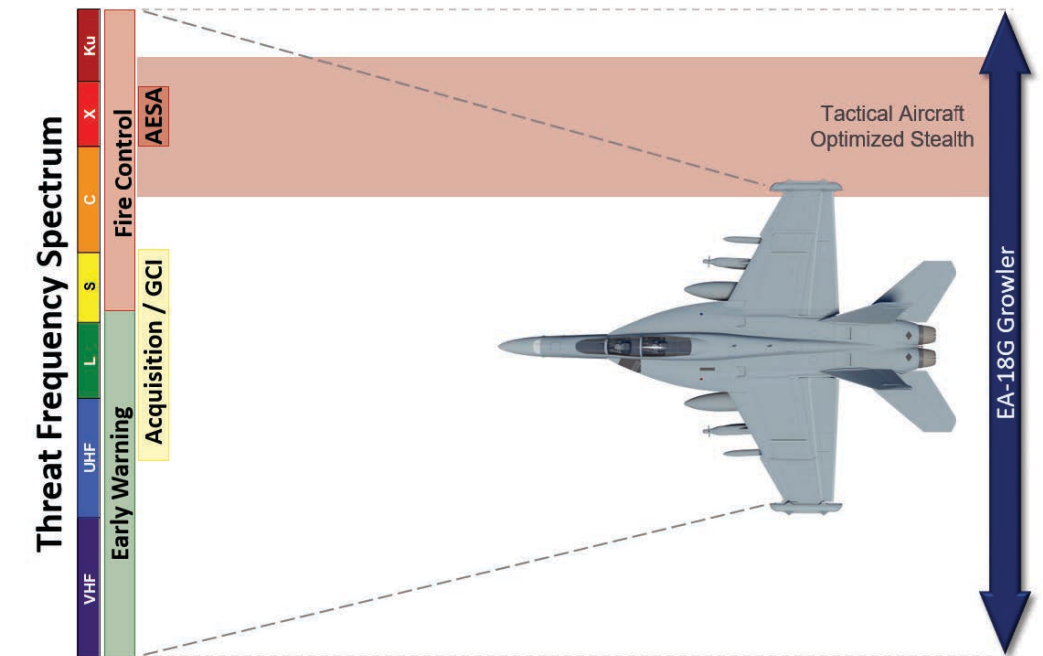

Enhanced Situational Awareness Increased Sensitivity Adaptive Electronic Attack
Network-Centric Warfare Rapid Capability Insertion

The Growler's proven combination of kinetic and non-kinetic weapons gives commanders the capabilities they need across the entire range of military operations, including strike, suppression of enemy air defenses, force protection, and reconnaissance.

- Only the Growler can adapt and counter evolving threats across the electromagnetic spectrum
- It is the only electronic warfare platform capable of operating in a high threat environment
- No aircraft goes into a contested environment without Growler providing electronic attack protection
- Over 90% of common components and systems with the Super Hornet
- Strike fighter capabilities of Super Hornet are all available to Growler
- More than 160+ Growlers in operation

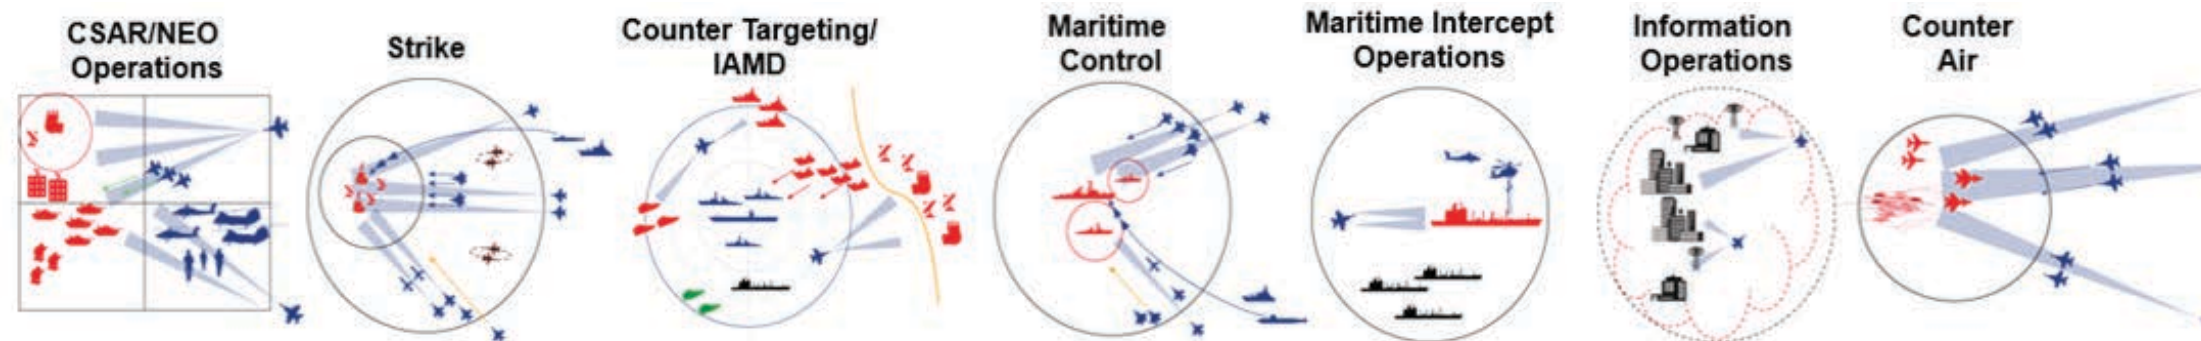

21ST CENTURY WARFIGHTING DOMAIN

The electromagnetic spectrum is a critical 21st-century warfighting domain. Stealth is perishable. Only a Growler provides full spectrum protection.

JOINT FORCE COMMANDER'S FORCE MULTIPLIER

Capable of conducting air, land and sea missions and is a key contributor to operations in the "Grey Zone"
