POWERED JOINT DIRECT ATTACK MUNITION
Affordable Standoff
Powered Joint Direct Attack Munition (PJDAM) is the ideal candidate for an affordable mass solution.

- Enhances JDAM to deliver decisive combat power from outside anti-access/area-denial (A2/AD) systems’ effective ranges
- Incorporates modular, compact air-breathing propulsion technology
- Provisioned for optional modular capability enhancements for increased lethality and survivability
- Capable of rapid integration on both legacy and next-generation platforms
- Maintains JDAM precision and impact condition control

### Long-Range, Precision-Guided Munition

- **Payload:** Up to 500 lb
- **All MK-82 form factor payloads**
- **Low-cost decoy fuel tank**
- **Range:** 200+ NM with 500 lb warhead (2x range extension with low-cost decoy fuel tank)
- **Optional enhancements (onboard 1.2 kW alternator):** seekers, data link, other mission avionics
- **Compatibility:** All existing JDAM-integrated aircraft (carried on all fighter and bomber GBU-31 stations)
- **Uses existing JDAM aircraft interface and In-Weapon LAR**
- **Game-changing improvement in precision strike**
- **Affordable long-range PGM augments shortages in expensive standoff missiles**
- **Enables 4th-gen platforms to contribute deep magazines to A2/AD theaters**
